1

Introduction

The State of Kansas (State), Department for Children and Families (DCF) engaged Mercer Government Human Services Consulting (Mercer) to conduct a study of market rates for child care services in the State. This study is a federally mandated bi-annual analysis of market rates, designed to assist DCF in determining whether current DCF child care subsidy rates are at a level such that families receiving these subsidies have similar purchasing power compared to private pay families.

This study is based on an analysis of data maintained and supplied by Child Care Aware® of Kansas (CCAKS) database. The database contains information on all regulated child care facilities in Kansas, including child care rates and hours of operation by provider type and age of child. The database also contains information on provider accreditation and professional development requirements, which were used as part of this analysis. These data represent rate information collected for the period of January 1, 2013 to December 31, 2013.

Mercer has used and relied upon the data from the CCAKS database. In addition, Mercer received actual child care benefit data covering the time period of June 2013 through August 2013 from DCF to complete the 'Family Share Comparison' presented in this report. While Mercer reviewed these data and information for reasonableness, we did not audit them and are not responsible for incomplete or inaccurate data provided by the State. If data supplied in the CCAKS database or provided by DCF are inaccurate or incomplete, the values shown in this report may need to be revised accordingly.

Organization of the Report

The report is organized into two main sections. Section 2 describes the methodology used to calculate the median rates and describes additional analyses that were conducted with respect to the current rate groupings. Section 3 provides a summary of the rates calculated in this analysis at the 75th percentile. The report also contains a series of appendices that provide information on median rates by county, area grouping, provider type, and age category. Note that the rates in Appendices 4 through 10 are not weighted by capacity.

2

Overview of Methodology

This section outlines the methodology used to develop the market rate analysis and provides an overview of changes made from the prior analysis.

Provider Type

Per DCF's request, all providers were categorized into one of two categories: Center or Licensed providers. Due to a change in Kansas' licensing laws, the category of Registered providers was phased out June 30, 2011.

Table 1 outlines the provider types in the CCAKS data that were used to classify providers into either the Center or Licensed categories. Providers who did not have a recognized value in the Provider Type field were excluded.

Table 1 – Provider Type Categories

Center	Licensed
Child Care Center	FCC Group
Exempt – Other	FCC Licensed, Temporary Kansas Department of Health and Environment (KDHE) Regulation
Exempt Head Start or School Age Program	FCC Licensed
Head Start Center	Temporary KDHE Regulation*
Preschool	FCC Licensed, FCC Registered
School Age Program	FCC Group, FCC Licensed
Temporary KDHE Regulation*	FCC Licensed, School Age Program
Child Care Center, Preschool	
Preschool, Exempt – Other	
School Age Program, Temporary KDHE Regulation*	

* Temporary KDHE Regulation is considered Licensed if the total licensed capacity is 10 or 12, and Center if the total licensed capacity is greater than 12.

Data Adjustments to Calculate Median Rates

The first step in the analysis process was to narrow the rate analysis to focus on full-time provider rates according to criteria discussed with DCF. For purposes of this document, these

providers will be referenced as “full-time providers”. Providers who met all of the following criteria were classified as full-time providers:

- Reported either full-time weekly or full-time monthly rates.
- Had care available Monday through Friday.
- Rendered services between 50–55 hours per week.

Note that there was no restriction on the actual time of day that the full-time providers operate. For example, a provider open outside a traditional work-hour day (for example, 4:30 am to 3:30 pm) is still considered a “full-time provider” as long as the provider meets the criteria above. Data for providers that reported alternative days of care (that is, Saturday and Sunday), only non-weekly or non-monthly full-time rates, and/or only part-time rates were excluded.

Mercer then performed an analysis to calculate the average number of hours a week of available care across the full-time providers in order to determine a conversion factor for the weekly and monthly rates. Based on this analysis, the average full-time care was determined to be 52 hours per week. Mercer used 4.33 as the average number of weeks per month of service.

Table 2 – Conversion Factor Calculation

Conversion Type	Division Factor	Calculation Basis
Hours per Week	52.00	Number of hours per week
Weeks per Month	4.33	52 weeks per year/12 months per year

After determining the conversion factors, Mercer calculated hourly and monthly rates for all full-time providers. The full-time weekly rates for these providers were converted to hourly rates by dividing the weekly rate by 52, and the weekly rates were converted to monthly rates by multiplying weekly rates by 4.33. Similarly, the full-time monthly rates for these providers were converted to hourly rates by dividing the monthly rates by 4.33 to calculate a weekly rate and then dividing that weekly rate by 52. Note, full-time monthly rates were used only when a full-time weekly rate was not reported by a particular provider in the CCAKS data.

Once hourly rates were calculated for all providers, Mercer eliminated hourly rates of less than \$1 and hourly rates of greater than \$10. All median rate calculations were developed based on the converted hourly and monthly rates with outliers eliminated.

County

Once providers were categorized into one of the two provider type categories and the rate data adjusted as described above, Mercer analyzed the rate data by county for the purpose of defining areas that reflect differences in rates based on the most recently available CCAKS data. To categorize each county into one of four areas, Mercer first calculated a provider-weighted median rate in each county based on the count of the full-time providers and their median rate

which were then weighted across the Center and Licensed providers. The provider-weighted median rates in each county were then analyzed and broken into four areas that reflect:

1. The greatest similarity in rates within an area.
2. The greatest differential in rates between the areas.
3. A consistent differential between the lower and upper bound of the range within each area.
4. A relatively similar population distribution within each area.

Table 3 outlines the county-by-county changes from the area groupings currently used by DCF for administering child care subsidies.

Table 3 – Area Changes

Area	Current Year Analysis	DCF Area Groupings
1	Johnson and Scott	Douglas, Johnson
2	Butler, Douglas, Leavenworth, Miami, Pottawatomie, Pratt, Riley, Sedgwick, Wyandotte	Atchison, Butler, Finney, Harvey, Leavenworth, Miami, Riley, Saline, Sedgwick, Shawnee, Wyandotte
3	Barton, Clay, Coffey, Ellis, Ellsworth, Finney, Ford, Franklin, Geary, Graham, Hamilton, Harvey, Jackson, Jefferson, Kingman, Linn, Logan, Lyon, McPherson, Mitchell, Morris, Nemaha, Ness, Norton, Osage, Osborne, Ottawa, Reno, Rice, Rush, Saline, Seward, Shawnee, Sherman, Smith, Stevens, Sumner, Thomas	92 remaining counties
4	56 remaining counties	N/A

Mercer provided summary information in Appendices 1a–c, 4a–b, and 5a–b based on both the current DCF Area groupings, as well as the area groupings developed in this year’s rate study.

Age

Mercer also calculated rates by age category using the following age categories and weightings supplied by DCF and based on the age group descriptions provided in the CCAKS data.

Table 4 – Licensed Provider Age Groupings

Rate Category	CCAKS Age Group Description
Under 18 months	Under Age 1

Rate Category	CCAKS Age Group Description
Over 18 months	12–17 months
	18–23 months
	2 years
	3 years
	4 years
	5 years
	6 years and older

Table 5 – Center Age Groupings

Rate Category	CCAKS Age Group Description
12 months and less	Under age 1
13 months–18 months	12 – 17 months
19 months–30 months	18–23 months
	2 years
31 months–5 years	(18–23 months + 2 years) *(0.217) + (3 years + 4 years + 5 years)*(0.783)
6 years +	6 years and older

Additional Analyses

In addition to developing median and percentile rates using the methodology described above, Mercer conducted three other analyses to determine whether the current rate groupings by provider types, area and age group should be further differentiated. Mercer and the State researched alternative definitions of full-time providers, such as a wider range of hours, before finalizing the parameters. In addition, Mercer analyzed actual benefit issuance data provided by DCF to evaluate how the rates for those receiving a subsidy compare to those paying market rates (that is, those who do not receive a subsidy).

Professional Development

DCF also requested an analysis of rate information to determine whether rates should be differentiated based on whether providers participate in professional development activities, including, but not limited to, Q-Tip Oh! Filling the Gap, KCCTO, DYFCCB, Infant Toddler Professional Development Events, KACCRRRA Sponsored statewide PD Events, NACCRRRA Conference, EBT, or CCR&R Sponsored Professional Development Events, as indicated in the “Prof Development” field. Table 6 provides a count of all providers reporting participation in one or more of these professional development programs. Please note that these provider counts include all providers, not just the full-time providers used in the median rate calculations.

Table 6 – Count of Providers with Reporting Participation in Professional Development Activities *

Area	Number Reporting Professional Development Participation
1	104
2	729
3	838
Total	1,671

* Based on current DCF Area groupings

For the providers who reported a full-time weekly or monthly rate, Mercer analyzed median rates to determine whether the rate groupings should be revised to differentiate between providers reporting participation in professional development activities and those not reporting participation. While it is anticipated that providers participating in professional development activities would generally have higher rates, the opposite relationship appears to be true in some cases. Therefore, it does not appear that revising the rate groupings to differentiate between providers reporting participation in professional development activities and those not reporting participation is warranted.

Table 7 – Comparison of Median Rates between Providers Reporting Participation in Professional Development Activities and Providers Not Reporting Participation in Professional Development Activities *

Area	Median Rates of Centers		Median Rates of Licensed Providers	
	Professional Development	Non-professional Development	Professional Development	Non-professional Development
1	\$3.41	\$3.98	\$2.88	\$3.08
2	\$2.79	\$2.69	\$2.31	\$2.31
3	\$2.02	\$2.31	\$1.83	\$1.92
Statewide	\$2.60	\$3.11	\$2.02	\$2.31

* Based on current DCF Area groupings

Accreditation

DCF also requested an analysis of rate information to determine whether rates should be differentiated based on whether providers are accredited by one of the following: the National Association for the Education of Young Children (NAEYC) or the National Association for Family Child Care (NAFCC). Table 8 provides a count of all providers reporting participation in one or more of these professional development programs. Please note that these provider counts include all providers, not just the full-time providers used in the median rate calculations.

Table 8 – Count of Providers with Accreditation by Accreditation Type *

Area	NAEYC	NAFCC
1	12	0
2	15	11
3	9	3
Total	36	14

* Based on current DCF Area groupings

While median rates for accredited providers tended to be greater than those of non-accredited providers, there were so few accredited providers that differentiating the rate groupings based on this criterion does not appear warranted.

Table 9 – Comparison of Median Rates between Accredited and Non-Accredited Providers *

Area	Median Rates of Centers		Median Rates of Licensed Providers	
	Accredited	Non-accredited	Accredited	Non-accredited
1	\$4.40	\$3.85	N/A	\$3.08
2	\$2.69	\$2.79	\$2.69	\$2.31
3	\$1.73	\$2.02	\$1.92	\$1.92
Statewide	\$3.89	\$2.81	\$2.50	\$2.15

* Based on current DCF Area groupings

Sole-Center Providers

DCF requested that for counties that have only one Center provider, an analysis be conducted to determine whether a separate rate category should be developed. Of the counties with a single Center provider, no providers met the criteria for the calculation of a full-time rate. Therefore, it appears that no change to the rate groupings is warranted for sole-center providers.

Comparison of Current Subsidy Rates to the 75th Percentile Market Rates

Mercer received the actual child care benefit data from DCF covering the time period of June 2013 through August 2013. These data contained the necessary information to calculate an average hourly rate by county (area), rate category (age) and provider type (Center or Licensed) based on the total benefit amount, which includes a sum of the amount paid by the family (copayment) and the amount of the subsidy.

The total benefit rate (average subsidy rate) was reviewed in relation to the 75th percentile of the full-time provider rates described in Section 2, which represent the market rates. The 75th percentile was used as the benchmark since the U.S. Department of Health and Human Services recommends that provider subsidy rates be set at the 75th percentile of the market rate

for families to have equal access.¹ In addition, the average subsidy rate was evaluated as a percentile within the current DCF Area grouping market rate ranges located in Appendix 4a. This analysis indicated that the Area 3 average subsidy rates appear to be the closest to the 75th percentile, while the Area 1 average subsidy rates present the most variation from the 75th percentile market rates, among the three areas.

Tables 10 and 11 show the results by provider type and rate category based on the current DCF Area groupings. The results are further summarized by provider type and current DCF Area groupings in Tables 12 and 13. Note that the statewide subsidy rates are weighted averages based on the count of actual records by area for June 2013 through August 2013 from the child care benefit data provided by DCF. In addition, the statewide 75th percentile market rates are weighted averages based on the count of full-time provider records by area from the CCAKS data. Rate categories were also assigned to the subsidy rate data based on the CCAKS age group descriptions. Further detail including the current subsidy rates² and 75th percentile market rates by county are summarized by provider type and age category in Appendix 10.

Table 10 – Subsidy Rates and 75th Percentile Market Rate Analysis for Licensed Providers by Rate Category and Area

Licensed Providers				
Rate Category	Area	Subsidy Rate	75 th Percentile Market Rates	Subsidy Rate Percentile

Summary of Results at the 75th Percentile

The following summarizes the hourly and monthly rates for full-time providers. Additional information regarding the percentile rates can be found in Appendices 4a-9e.

The following tables outline the 75th Percentile rates on a monthly and hourly basis and the Current Maximum hourly rates for full-time Licensed and Center providers based on the market data provided by CCAKS. **Please note that the 75th percentile rates in these tables are based on the 4-area groupings developed in this analysis, while the current maximum hourly rates are based on DCF's current 3-area groupings.** Appendices 4a and 5a contain a summary of median and percentile rates based on DCF's current 3-area groupings.

Table 14 – Licensed Full-time Work Hours Rates

Group	75th Percentile – Monthly	75th Percentile – Hourly	Current Maximum Hourly Rates from Market Data
Under 18 Months

¹ Proposed area grouping was assigned based on observing county by county rate changes in column K from the sorted weighted rates in column J.

² Full-time providers deliver services Monday through Friday for 50-55 hours per week and have a FT weekly or FT monthly rate.

³ Percent change from the previous county's weighted rate in column J.

⁴ Estimated 2013 population from the United States Census Bureau: <http://quickfacts.census.gov/qfd/states/20/20071.html>

APPENDIX 2

Number of Providers by County and Provider Type

Appendix 2 Number of Providers by Type and Group

The following table counts the number of providers for each County by Regulation Type and Group.

The table is based on the information in the CCAKS database as of January 2013. The actual number of providers would differ.

Note, these counts include all providers in the CCAKS database with Regulation Type of Licensed or Center (i.e. Full-Time and Part-Time providers, alternative day providers, providers without rates, providers with outlier rates, etc.)

¹ Based on the current child care market rate area groupings.² Subsidy Rate figures provided by State of Kansas Appendix Item C-18 Provider Rate Chart 01-09
Rate Categories are based on the CCAKS Age Group Descriptions.³ Based on full-time providers delivering services Monday through Friday for 50-55 hours per week. Rate category
and County combinations with limited full-time provider rates may represent multiple points in the market rate range.

¹ Based on the current child care market rate area groupings.² Subsidy Rate figures provided by State of Kansas Appendix Item C-18 Provider Rate Chart 01-09
Rate Categories are based on the CCAKS Age Group Descriptions.³ Based on full-time providers delivering services Monday through Friday for 50-55 hours per week.

Rate category and County combinations with limited full-time provider rates may represent multiple points in the market rate range.
